

eurowood™

The stunning timber look finish that never requires painting.

Enjoy the natural beauty of timber without the high maintenance costs.

PHOTOGRAPHIC REALISM

A unique patented process enables us to photograph exactly the wood grain of any timber species and reproduce this image including all the knots and flames on to an aluminium profile of any shape or size.

This timber image is then impregnated on to a marine grade powder coated aluminium profile giving it an enduring finish which is guaranteed for 10 years, including right on the beach. This timber look finish feels

and looks like real timber without any of the ongoing maintenance issues that real timber has.

This process is very environmentally responsible as it allows the market place to have the stunning beauty of a real timber look finish without the need to cut down a single tree.

This eurowood™ process cannot be used on any welded products.

10 Year Guarantee

eurowood™ Colours

Marine Grade Powder Coated Aluminium

Fencing

Tassie Oak
